HOW TO SELECT YOUR PERFECT WIRQUIN TOILET SEAT

1 - APPLICATION

	Application	Assets
THERMOSET	 HIGH TRAFFIC  PUBLIC PLACES  COST EFFECTIVE  EVERYDAY USE	Hygienic: Naturally anti-bacterial Scratch, UV & chemical resistant Resilient: Extremely strong & durable
THERMOPLASTIC	 HIGH TRAFFIC  COST EFFECTIVE  EVERYDAY USE	Shatterproof 100% recyclable
MOULDWOOD	 EVERYDAY USE	Heavy weight Gloss finish

3 - HINGE TYPE

Bottom fixing is a traditional type of fitting where the underside of the mounting holes are accessible to allow the tightening of the hinge fixings.

Top fixing is required when there is a limited/no access to the underside of the hinge mounting holes (blind hole pans).

Quick release for easy removal of the seat without tools, enabling thorough cleaning for maximum hygiene

Soft Close incorporating specialist dampers for a gentle, quiet closing action, offering added safety. No more trapped fingers.

Lock+ is a clever innovation that stops seat movement by filling the gap between the bolt and the pan.

Lock+ is included as standard with the Modufix range.

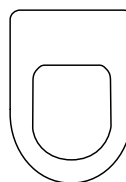

2 - PAN SHAPE AND SIZE

> IDENTIFY YOUR PAN SHAPE

**TRADITIONAL
ROUNDED NOSE**

- Club
- Emerald
- Neon
- Neon Lite
- E-2
- S-1
- Calypso
- Family

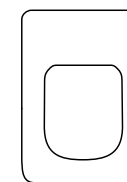

**TRADITIONAL
POINTED NOSE**

THERMOSET MATERIAL

Thermoset Seats are manufactured from Transformed Urea Formaldehyde (T.U.F), a dense material noted for its incredible strength and durability. Coupled with anti-bacterial properties make it ideal for high traffic areas such as hospitals and building developments.

RESILIENT

- Extremely strong, durable and hard wearing material

RESISTANT TO SCRATCHES, FLAMES AND CHEMICALS

NATURAL ANTI-BACTERIAL PROPERTIES
