NO TOUCH FLUSH ACTIVATOR

INFORMATION

- The infra-red sensor is a hygienic, family friendly option, to push button alternatives.
- The flushing valve and sensor is operated by 4 x AA batteries, with a lifecycle of 15 000 flushes. There is also a manual override should the batteries fail.
- The Jollytronic is suitable for both existing and new cisterns. It's ideal for all applications from en-suite to downstairs loos !
- Quick and easy to install, it's a good way to upgrade the bathroom quickly and effortlessly.
- It has also been developed from the youngest to the oldest member of the household.
- This flushing valve is a very hygienic way to operate your W.C. thanks to the infra-red sensor.
- A 10 year guarantee on the flushing valve and a 1 year guarantee on the electronic sensor.
- The no touch flushing system allows the user to determine how long the flush lasts for. It's perfect for households on a water meter !
